### SCHEDULE:

October 2018 – December 2018

### DESCRIPTION:

This project was a renovation of the existing field at Joseph P. Riley Park. The field had settled over time due to its location near the intercoastal waterway. We installed a sheet piling wall along the outfield fence to prevent future problems. The field work included a new drainage system, irrigation system, adding rootzone and infield mixture, installing Carolina Green sod, and repairing the warning track.
